

What happens when I'm not wearing any lipstick?

Permanent Lip-Liner will make your lips look just like you want them to be. You can correct imperfect lip line, make your lips fuller, or just outline your own nice lips. I have rebuilt complete lips, corrected cleft palates so they didn't need to wear lipstick, or just make a line that doesn't disappear. The color can be bold or can match your own lip color, that choice is yours. When you wear lipstick it seems to last longer and if you just put on a gloss it looks like soft lipstick.
